Seamless integration for your franchise

Worldpay understands the need for integration across your network. We understand the requirements of integrating your systems and helping your franchisees streamline their operations while supporting each location's revenue growth.

Our payment solutions support flexible operating models. Wherever you engage with customers—at the till, on the move, or online—we offer fast, secure and reliable payment options:

Stand-alone terminals

Simple, reliable and affordable, performing basic payment processing functions

Mobile terminals

Transportable, offering similar functionality as above with the ability to connect to the authorisation network via Bluetooth, WiFi or 3G/4G networks

Integrated terminals

The connections between critical business payment processing functions and other vital business systems, like accounting, payroll and customer relationship management (CRM)

Online payment processing

Lets you accept payments conveniently and securely with an online payment gateway

Seamless integration for customers

We've shown how our payment solutions will seamlessly support your back end, but what about your front end? Here too, we can provide a seamless experience for customers at all locations.

Look to Worldpay to help you and your franchisees:

Bring a consistent and frictionless experience to your consumers

Allow customers to pay the way they want to maximise revenue conversions

Keep up and offer the latest alternative payment methods

Ability to grow and scale

Working with a trusted partner like Worldpay could ensure that your franchise—and the health and profitability of your franchisees—will continue to flourish amid a competitive landscape. Any payment solution you employ needs to be scalable, easy to implement and frictionless. All these features Worldpay could provide.
