

WHAT'S INVOLVED?

Whether you are a franchisor or franchisee we will support you every step of the way.

Our process is very simple:

- 1) We set up you as the franchisor with your own Data Protection Management System
- 2) We arrange one to one consultancy sessions with you and your team to educate you about data protection, and complete your system/s so that you can demonstrate and manage your own legal responsibilities
- 3) We set up every franchisee with their own Data Protection management system/s
- 4) We arrange ongoing one to one consultancy sessions with EVERY franchisee to educate them about data protection and complete their system so that they can demonstrate and manage their legal responsibilities
- 5) We then work with you to create your own Data Protection overview system which gives you a bespoke view of your WHOLE network – you can see potential risks, support your franchisees, report accurately to the board and provide additional value to your network

How does this benefit you and your franchisees?

- **Saves you time.** Making sure each franchisee is meeting their legal requirements is a lengthy and time-consuming process. *We do all that work for you.*
- **Gives you Understanding.** Our process makes sure that you are aware of EXACTLY what is going on with your data across the WHOLE business AND your franchisees understand as well.
- **Identification of risks.** As we are speaking to all of your franchisees we will be able to identify risks to your brand that you never even knew existed.
- **Instant reporting.** Once your franchisees are up to speed with the system/s you will be able to activate your management overview system. This means that you will be able to audit/report/identify risks/manage at the touch of a button. *This leaves you more time for your franchisees to run their business and make more money for them and you.*
- **Unique added value consultancy.** As we work one to one with your and each of your franchisees, you essentially get a one to one consultancy service – at no additional cost to you.
