## Franchising Get A Drip – Case Study

Keeping you up to date with franchise news & updates.

November 3, 2021

Ashtons Franchise Consulting assisted in franchising Get A Drip in 2020, after the founder, Richard Chambers saw an opportunity for exponential growth. This is their background story into franchising the business....

### Who are Get A Drip?

---

Founded in 2017, Get A Drip, offers the widest range of Vitamin Booster Shots and IV Drips in the UK – the Booster Shot and Intravenous Vitamin Drip Therapy is fast acting as it bypasses the gastrointestinal system allowing 100% of the vitamins and nutrients to be absorbed directly into the body. Medical professionals, including GMC registered doctors, NMC registered nurses, pharmacists and paramedics can administer the shots and drips from either a stand-alone clinic, as a bolt on to another clinic or as a mobile, ‘we come to you’, service.

The origins of the business derive from personal factors in that Richard felt the benefits of Vitamin Drips in hospital while being treated for complications arising from his Diabetes. After seven years of researching the benefits of drips, Get A Drip Clinics were opened in London’s Shoreditch Box Park and later in Westfield Shepherds Bush.

### Choosing franchising as a route to expansion

---

Get A Drip first met with Ashtons in 2018, but were advised that it was a little too early to franchise. So they went away, worked on proof of concept, and a year or so later were ready to get cracking! Consultant Richard Langrick worked with them from the outset; from the feasibility and planning stage, to the full franchise development, recruitment and launch.

### What is next for Get A Drip?

---

It is currently November 2021 and Get A Drip has already opened 4 franchise locations. Demand in the UK is strong and Richard’s plan for the near future is to open lots more stores. He says, “Our aim is to improve everyone’s health and wellness, with what we see is the future of doing things and make it as accessible to as many people as possible. I want the business to do really well and expand globally– a pure focus on growth”.

### Franchising Get A Drip – Interview

---

We interviewed Richard Chambers about the full journey for franchising Get A Drip, watch the video below. Richard not only talks about his experience with franchising Get A Drip but offers some very valuable advice to potential franchisors.

**A full Case Study (PDF) on Get A Drip and their journey into franchising can be downloaded below....**

### Franchise My Business - Get A Drip

## Get A Drip CASE STUDY

**Founder:**  
Richard Chambers

**Founded:** 2017

Richard felt the benefits of Vitamin Drips in hospital while being treated for complications arising from his Diabetes. After seven years of researching the benefits of drips, Get A Drip Clinics were opened in London's Shoreditch Bus Park and later in Westfield Daycents Bush.

**What they do:**  
Get A Drip offers the widest range of Vitamin Booster Shots and IV Drips in the UK. The Booster Shot and Intermittent Vitamin Drip Therapy is fast acting as it bypasses the gastrointestinal system allowing 100% of the vitamins and nutrients to be absorbed directly into the body. Medical professionals, including GMC registered doctors, NMC registered nurses, pharmacists and paramedics can administer the shots and drips from either a stand-alone clinic, as a bolt on to another clinic or as a mobile, we come to you, service.

**Why they're great:**  
Get A Drip are an award-winning company (Most Innovative Business in Health and Wellness) with press coverage in The Guardian, Telegraph, Daily Mail, Sun, GQ and Grazia to name but a few. They're known for disrupting the wellness industry and alongside their extensive menu they also offer DNA tests to enable their customers to give their bodies the exact nutrition it requires based on their unique genetic makeup.

**Interview with Richard Chambers**

**Why did you choose to franchise the business?**  
"Exponential growth. Franchisees are more likely to run a business better than I can get a manager to run a business, having someone that is local and has skin in the game is going to yield much better results. Franchisees can then deploy their capital to expand as well."

**How did Ashtons Franchise Consulting help you?**  
"We first met Ashtons in 2018, we then both went away (and did proof of concept work), as it was too early for us to franchise. And then after that we worked with them for about, well we still work with them now as we've retained Ashtons ongoing to advise us and we use Ashtons Legal as well, but about a year worth of pre-work I'd say. Everything is under one roof, any questions flow fluidly between back and forth. There's always tiny adjustments and having it all in house makes it so much easier."

**What's been your biggest challenge in developing the franchise?**  
"For us it was deciding on the type of franchise, so originally, we said we were only going to do mobile franchisees, and then people came along saying they wanted to do it in-house, in clinics and concessions. So, we went round and round in circles, deciding the type of franchise we were going to offer, and then try to stick to that, but in reality, you launch and then you realise you should probably do it another way too."

**What do you look for in a franchisee?**  
"Whilst having medical knowledge is an advantage, it isn't an essential attribute, what we look for above all else is passion! If the candidate is ambitious, motivated and considers themselves a good leader then we would love to hear from them. Our network of franchisees come from various backgrounds, but all are hardworking, driven and dedicated to making their business a success."

**What does the future look like?**  
"Many more stores, so lots of stores, growth really. Our aim is to improve everyone's health and wellness, with what we see is the future of doing things and make it as accessible to as many people as possible. I want the business to do really well and expand globally – pure focus on growth!"

**What's your best tip for other "would be" franchisees?**  
"Map it out with a consultant. We're going for our BFA accreditation, we expect to hopefully get it this year, so we know what we've built is good, and with some of the challenges we've had, if we hadn't done all that leg work at the beginning (like a year's worth of background work just to launch, going through absolutely everything) had we not done that we wouldn't be where we are today. So, you definitely need to take on a consultant asap, so soon as you know you're going to franchise, bring them on, the later you leave it they're just going to go and unpack all the work you've done!"
